DEPARTMENT OF MARINE AND FISHERIES, CANADA

MONTHLY RECORD

OF METEOROLOGICAL OBSERVATIONS

JULY, 1917

STATIONS OF THE METEOROLOGICAL SERVICE OF CANADA

PROVINCE OF BRITISH COLUMBIA.

STATION.	Class.	Lat. N.	Long. W.	Height above Sea Level. Feet.	Name of Observer.
		° ′	° ′		
Agassiz (Experimental Farm)	IIS	49 14	121 31	52	P. H. Moore.
Alberni	II	49 15	124 49	300	Stanley R. S. Bayne.
Alert Bay	II	50 33	127 0	....	Miss A. E. Nevill.
Alkali Lake	III	51 47	122 20	....	C. E. W. Johnson.
Alvaston	II	50 3	119 27	1325	M. P. Williams and W. C. Rowles.
Annis (See Canoe Point).					
Anyox	II	55 27	129 48	370	F. E. Patton.
Armstrong	II	50 26	119 11	1187	L. W. Patten.
Atlin	TI	59 35	133 38	2240	A. B. Taylor.
Babine Lake Hatchery	II	55 38	126 26	2230	T. J. Jenkins and H. C. Crawford.
Barkerville	TI	53 2	121 35	4180	T. F. Murphy.
Baynes Lake	II	49 13	115 12	2800	D. W. Hart.
Bear Creek (Jordan River)	III	48 28	124 0	....	W. Appleton and A. E. Homewood.
Bella Coola	II	52 40	126 54	150	C. H. Urseth.
Big Creek (Chilcotin)	II	51 40	123 0	3100	H. E. Church.
Boatswain Bank (Cobble Hill)	II	48 42	123 37	33	A. Allen.
Boswell	II	49 29	116 41	....	Mrs. K. Wallace.
Britannia Beach	II	49 39	123 5	165	The Operators.
Canoe Point (Annis)	III	50 48	119 4	....	David Jackson.
Castlegar	II	49 20	117 40	1480	Arthur E. Pittaway.
Chilcotin (See Big Creek)					
Chilliwack	II	49 10	121 57	21	J. H. Chapman.
Chinook Cove	II	51 14	120 10	....	W. W. Elder and A. L. Foster.
Clayoquot (Tofino)	II	49 11	125 55	27	John Grice.
Clo-oose	II	49 40	124 50	....	L. C. J. Matthews.
Coldstream Ranch (See Vernon).					
Cobble Hill (See Boatswain Bank).					
Copper Mountain	III	49 19	120 30	....	Wilfred E. Freeman.
Coquitlam	III	49 16	122 51	34	R. D. Irvine.
Coronation Mine	II	50 51	122 21	3570	Wm. Haylmore.
Cowichan (See Tzouhalem).					
Cranberry Lake	II	52 50	119 20	2460	John C. Bocz.
Cranbrook	II	49 30	115 50	3014	F. J. Smith.
Crawford Bay	II	49 45	116 45	2000	Walter J. Kidman.
Creston	II	49 6	116 33	1985	G. B. Henderson, M.D.
Denman Island	III	49 31	124 48	....	James Ormiston.
Departure Bay	II	49 40	124 0	....	C. McLean Fraser.
Deroche (See North Nicomen).					
East Arrow Park	II	50 5	117 55	1413	Henry Miller.
Edith Lake (Kamloops)	II	50 37	120 33	.....	R. Burgess.
Elko (See Fruitlands).					
Enderby	II	50 32	119 7	1180	N. H. Kenny.
Entrance Island	I	49 12	123 56	35	Wm. E. Morrissey.
Fauquier (Needles)	II	49 54	118 6	1460	J. E. Smedley.
Ferguson	III	50 40	117 29	....	A. C. Cummins, P.M.
Fernie	II	49 30	115 3	3305	Chas. J. Murphy.
Fort George (now Prince George)	II	53 55	122 41	....	Forestry Office.
Fort St. James (Stuart's Lake)	II	54 28	124 12	2280	A. C. Murray.
Fort St. John	II	56 15	120 53	1462	W. J. Reid.
Fruitlands (Elko)	II	49 1	115 5	2684	Michael Phillips and Miss A. Phillips.
Ganges (Salt Spring Island)	II	48 50	123 20	....	S. W. Dean.
Garry Point (Steveston)	II	49 6	123 17	....	A. A. Parker.
Gateway (See Newgate).					
Gillies Bay (Vananda, Texada Island)	II	49 40	124 32	....	P. A. Staaf.
Glacier	II	51 14	117 29	4072	T. W. Shaw.
Glenemma	II	50 22	119 19	....	W. F. Smith.
Golden	II	51 16	116 55	2550	S. E. Hambly and C. H. Parson.
Goldstream Lake	III	48 27	123 33	1505	Thomas H. Gemmell.
Grand Forks (Rayfield Ranch)	II	49 2	118 27	1746	E. F. Laws.
Greenwood	II	49 1	118 6	2400	P. H. Currach.
Hedley	II	49 25	120 10	1771	R. Wheeler.
Hedley (Nickle Plate Mine)	II	49 20	119 59	4500	M. L. Gezon and J. O. Stevens.
Hilton (See Richlands).					
Holberg	II	50 39	128 18	....	Thos. Hoem and H. Hansen.
Hope (Little Mountain)	II	49 25	121 25	500	T. L. Thacker.
Hornby Island	III	49 30	124 39	....	J. O. Lucas.
Howser	II	50 18	117 0	....	C. Malloch.
Hudson's Hope	II	56 5	121 55	1522	J. A. Macdougall.
Ikeda Head (Jedway)	II	52 17	131 7	5	H. T. Hillier and J. E. Harker.
Invermere (Exp. Farm)	IIS	50 30	116 2	2650	G. E. Parham.
Invermere	III	50 28	116 3	2650	Basil G. Hamilton.
Ioco (Deer Lake)	III	.....	.....	....	A. Clarke.

CLASSIFICATION.

CLASS I.:—A station where eye-readings of pressure, temperature, humidity, cloudiness, wind (velocity and direction), and precipitation, are taken twice or thrice daily. At those stations of this class marked "T," the results at 8 a.m. and 8 p.m., 75th meridian time, are telegraphed to Toronto immediately after the reading.

CLASS II.:—A station where the equipment consists of a maximum and a minimum thermometer and a rain gauge, ordinarily, although at a few the equipment is more extensive.

CLASS IIb.:—A station equipped with a mercurial thermometer, where readings are taken at certain local times. A rain gauge completes their equipment.

CLASS IIm.:—A station of the second-class in operation during the summer months only, in order to telegraph results daily for the preparation of the morning bulletin during the agricultural season.

"S":—The letter S appended to the classification of a station denotes that there is an instrument in use for the automatic registration of the duration of bright sunshine.

CHIEF STATIONS:—These are denoted in the lists by the letter "A." At these stations provision is made for the automatic registration of all the principal elements, and for eye-readings at certain stated times daily, to afford control of the autographic equipment. At these stations the value of any meteorological element can be given with considerable accuracy for any required moment.

CLASS III.:—These stations are devoted entirely to the measurement of precipitation.

GENERAL SYNOPSIS OF TEMPERATURE AND PRECIPITATION.

The following table is intended to show the average values of temperature and precipitation for each province for the month under review. District and Provincial means would, under ideal conditions, be derived from stations distributed in equi-areal squares. But since in reality they are so situate as to appear, rather, constellation-wise upon the map, anomalous values arising from local topographical peculiarities may have received more than their just weight in the computation of the following averages.

Where no difference from normal is assigned, observations over a period long enough for reference are not available.

JULY, 1917

PROVINCE AND DISTRICT.	Temperature (Fahr.).						Precipitation.				STATION DIFFERENCES FROM NORMAL TEMPERATURE
	Mean Daily.	Mean Daily Maximum.	Mean Daily Minimum.	Mean Daily Range.	Extreme Highest.	Extreme Lowest.	Total in Inches.	Difference from Normal.	Number of Days.	Greatest Fall.

HIGH AREAS.

Five areas of high pressure were charted. Three first appeared in the far northwestern portion of the continent, and two on the coast line of the North Pacific States. The general course of the areas was over the Great Lakes, thence to the Atlantic seaboard. They conformed to the usual feeble summer type of high pressure systems.

LOW AREAS.

Seven areas of low pressure were sufficiently defined to allow of their paths being approximately charted. One first appeared in the vicinity of the Yukon Territory, two near Central British Columbia, and four in the North Pacific States. Two of the areas passed over, while the remainder travelled far to the northward of the Great Lakes. The systems were on the whole of the usual feeble summer type and no gales were reported in Canada.

ATMOSPHERIC PRESSURE.

The differences from mean monthly pressure were as follows: Dawson, —.28; Atlin, —.07; Prince Rupert, —.05; Barkerville, +.04; Victoria, +.03; Vancouver, .00; Kamloops, —.09; Banff, —.06; Edmonton, —.04; Calgary, —.04; Medicine Hat, —.15; Battleford, —.04; Prince Albert, —.06; Swift Current, —.12; Moose Jaw, —.04; Qu'Appelle, —.09; Minnedosa, —.07; Le Pas, —.05; Winnipeg, —.06; Port Arthur, —.06; White River, —.08; Parry Sound, —.04; Southampton, —.04; Port Stanley, —.03; Toronto, —.04; Kingston, .00; Stonecliffe, —.02; Ottawa, —.04; Montreal, —.01; Quebec, .00; Father Point, +.03; Chatham, —.03; St. John, .00; Charlottetown, —.05; Halifax, +.01; Yarmouth, —.01; Sydney, +.02; Sable Island, +.02; St. John's, —.06; Port aux Basques, +.01; Prospect Fort. Bermuda, +.05.

DEPARTMENT OF MARINE AND FISHERIES, CANADA

MONTHLY RECORD

OF METEOROLOGICAL OBSERVATIONS

AUGUST, 1917

GENERAL SYNOPSIS OF TEMPERATURE AND PRECIPITATION.

The following table is intended to show the average values of temperature and precipitation for each province for the month under review. District and Provincial means would, under ideal conditions, be derived from stations distributed in equi-areal squares. But since in reality they are so situate as to appear, rather, constellation-wise upon the map, anomalous values arising from local topographical peculiarities may have received more than their just weight in the computation of the following averages.

Where no difference from normal is assigned, observations over a period long enough for reference are not available.

AUGUST, 1917

PROVINCE AND DISTRICT.	Temperature (Fahr.).						Precipitation.				STATION DIFFERENCE FROM NORMAL TEMPERATURE
	Mean Daily.	Mean Daily Maximum	Mean Daily Minimum.	Mean Daily Range	Extreme Highest.	Extreme Lowest.	Total in Inches.	Difference from Normal	Number of Days	Greatest Fall

DEPARTMENT OF MARINE AND FISHERIES, CANADA

MONTHLY RECORD

OF METEOROLOGICAL OBSERVATIONS

SEPTEMBER, 1917

GENERAL SYNOPSIS OF TEMPERATURE AND PRECIPITATION.

The following table is intended to show the average values of temperature and precipitation for each province for the month under review. District and Provincial means would, under ideal conditions, be derived from stations distributed in equi-areal squares. But since in reality they are so situate as to appear, rather, constellation-wise upon the map, anomalous values arising from local topographical peculiarities may have received more than their just weight in the computation of the following averages.

Where no difference from normal is assigned, observations over a period long enough for reference are not available.

SEPTEMBER, 1917

PROVINCE AND DISTRICT.	Temperature (Fahr.).						Precipitation.				STATION DIFFERENCES FROM NORMAL TEMPERATURE
	Mean Daily.	Mean Daily Maximum.	Mean Daily Minimum.	Mean Daily Range.	Extreme Highest.	Extreme Lowest.	Total in Inches.	Difference from Normal.	Number of Days.	Greatest Fall.

DEPARTMENT OF MARINE AND FISHERIES, CANADA

MONTHLY RECORD

OF METEOROLOGICAL OBSERVATIONS

OCTOBER, 1917

GENERAL SYNOPSIS OF TEMPERATURE AND PRECIPITATION.

The following table is intended to show the average values of temperature and precipitation for each province for the month under review. District and Provincial means would, under ideal conditions, be derived from stations distributed in equi-areal squares. But since in reality they are so situate as to appear, rather, constellation-wise upon the map, anomalous values arising from local topographical peculiarities may have received more than their just weight in the computation of the following averages.

Where no difference from normal is assigned, observations over a period long enough for reference are not available.

OCTOBER, 1917

PROVINCE AND DISTRICT.	Temperature (Fahr.).						Precipitation.				STATION DIFFERENCES FROM NORMAL TEMPERATURE
	Mean Daily.	Mean Daily Maximum	Mean Daily Minimum.	Mean Daily Range.	Extreme Highest.	Extreme Lowest.	Total in Inches.	Difference from Normal.	Number of Days.	Greatest Fall.

DEPARTMENT OF MARINE AND FISHERIES, CANADA

MONTHLY RECORD

OF METEOROLOGICAL OBSERVATIONS

NOVEMBER, 1917

GENERAL SYNOPSIS OF TEMPERATURE AND PRECIPITATION.

The following table is intended to show the average values of temperature and precipitation for each province for the month under review. District and Provincial means would, under ideal conditions, be derived from stations distributed in equi-areal squares. But since in reality they are so situate as to appear, rather, constellation-wise upon the map, anomalous values arising from local topographical peculiarities may have received more than their just weight in the computation of the following averages.

Where no difference from normal is assigned, observations over a period long enough for reference are not available.

NOVEMBER, 1917

PROVINCE AND DISTRICT.	Temperature (Fahr.).						Precipitation.				STATION DIFFERENCES FROM NORMAL TEMPERATURE
	Mean Daily.	Mean Daily Maximum.	Mean Daily Minimum.	Mean Daily Range.	Extreme Highest.	Extreme Lowest.	Total in Inches.	Difference from Normal.	Number of Days.	Greatest Fall.

DEPARTMENT OF MARINE AND FISHERIES, CANADA

MONTHLY RECORD

OF METEOROLOGICAL OBSERVATIONS

DECEMBER, 1917

GENERAL SYNOPSIS OF TEMPERATURE AND PRECIPITATION.

The following table is intended to show the average values of temperature and precipitation for each province for the month under review. District and Provincial means would, under ideal conditions, be derived from stations distributed in equi-areal squares. But since in reality they are so situate as to appear, rather, constellation-wise upon the map, anomalous values arising from local topographical peculiarities may have received more than their just weight in the computation of the following averages.

Where no difference from normal is assigned, observations over a period long enough for reference are not available.

DECEMBER, 1917

PROVINCE AND DISTRICT.	Temperature (Fahr.).						Precipitation.				STATION DIFFERENCES FROM NORMAL TEMPERATURE
	Mean Daily.	Mean Daily Maximum.	Mean Daily Minimum.	Mean Daily Range.	Extreme Highest.	Extreme Lowest.	Total in Inches.	Difference from Normal.	Number of Days.	Greatest Fall.
